GLAMOROUS

GLAMUROZNO

We use this word so rarely however it is so beautiful and emotionally expressive. Why? Why do not we say more?

GLAMOROUS!

Maybe we simply do not realize in our rushing world that life brings us so many glamorous moments. These could be very small and tiny things moreover most of them are considered as everyday issues however they would deserve this wonderful attribute the most.

Love and appreciate the beauty in your life and see that your nails can be also simply glamorous. **And if someone would say “Glamorous!” to your nails proudly whisper there:**

Koristimo ovu reč tako retko iako je toliko lepa i emotivna. Zašto? Zašto je češće ne govorimo?

GLAMUROZNO!

Možda jednostavno ne uviđamo u našem užurbanom svetu da nam život donosi toliko mnogo glamuroznih trenutaka. To mogu biti sitne i male stvari koje se sve više smatraju svakodnevnicom, a baš te stvari najviše zaslužuju ovaj prelepi pridev.

Volite i cenite lepotu u svom životu i videćete da i vaši nokti mogu biti jednostavno glamurozni. **I ako bi neko rekao „Glamurozni“ za vaše nokte, ponosno tu šapnite:**

EN Problematic nails? Get over here! There is no challenge for Bond Booster Base Gel! This brand new base gel **functions like a GLUE** between the natural nail **and any of our sculpting gels** (Classic Line, Evolution Line, Luxury Line).

Usage:

Gently file the natural nail with buffer and use Nail Prep and then Primer (and/or Acid Free Primer) to prepare the natural nail chemically. Apply a very thin layer of Bond Booster Base Gel and **“massage” the gel deep** into the fibers of the natural nail with the brush. Always clean the brush on the mouth of the bottle properly and work with **as little amount** of gel as possible. Do not remove the tacky residue after curing.

SRB Problematični nokti ? Imamo rešenje ! Ne postoji izazov za Bond Booster Base gel ! Ovo je potpuno novi bazni gel koji funkcioniše kao lepak između prirodnog nokta i bilo kog builder gel-a (Klasična linija , Evolution linija , Luxury linija)

Upotreba:

Nežno izmatirate prirodan nokat blok turpijom i nanesite Nail Prep a zatim Prajmer (i/ ili Primer Acid Free) da bi ste nokat pripremili hemiski. Nanesite veoma tanak sloj Bon Booster Base gel-a i “masirajte” gel duboko u vlakna prirodnog nokta sa četkicom. Uvek očistite četkicu od vrh boce i radite sa što je moguće manjom količinom gela. Ne uklanjajte lepljivi sloj posle sušenja .

CLASSIC LINE

Silky Clear Gel

Base Gel - Bazni gel

EN 3-phase base gel with flowing consistency so that the gel can stick between the buffed fibers of the natural nail ensuring perfect adhesion for the upcoming gel layers. First step in a three-phase gel system working as an adhesion promoter to the natural nails or tips.

SRB Trofazni bazni tečni gel koji može da se zalepi između naboranih vlakana prirodnog nokta, time omogućujući savršeno prijanjanje narednih slojeva gela. Prvi korak u sistemu trofaznog gela koji unapređuje prijanjanje na prirodne nokte ili tipse.

Medium Clear Gel

Sculpting Gel - Gel za izlivanje

EN The very best multifunctional sculpting gel with amazing adhesion and incredible control. Medium viscosity clear gel which is excellent for sculpting, filling and covering purposes as well. Can be pinched superbly.

SRB Jedan od naših najboljih višefunkcionalnih oblikujućih gelova sa odličnim sposobnostima prijanjanja i nadogradnje, koji omogućava neverovatnu kontrolu rada. Ovaj providan gel srednje gustine je savršen za izlivanje, turpisanje i kao završni gel. Izvanredan je za pinčovanje.

CLASSIC LINE

Deluxe Clear Gel

French Pink Gel

Sculpting Gel - Gel za izlivanje

EN Medium viscosity light pink colored french sculpting gel with great self levelling capability. Provides very nice natural appearance in case used as a top cover layer on sculpted nails.

SRB Svetlo roze oblikujući gel srednje gustine za francuski manikir sa odličnom sposobnošću samoravnjanja. Daje jako lep prirodan izgled ako se koristi kao završni sloj preko oblikovanih noktiju.

Deluxe Natural Gel

Camouflage Gel - Kamuflažni gel

EN Nude builder gel with a light and soft skin tone.

Features:

- one-phase
- crystalline structure
- ensures complete control but also self-levelling
- quick and easy saloon nails
- can be pinched superbly therefore also highly recommended for extreme forms

SRB Prirodan builder gel sa svetlijom i mekšom bojom.

Karakteristike :

- kristalna struktura
- obezbeđuje potpunu kontrolu ali i samoravnjajući je
- brzo i jednostavno izlivanje salonskih noktiju
- savršeno se pinčuje i iz tog razloga ga preporučujemo za ekstremne forme

CLASSIC LINE

Cover Pink Gel

Camouflage Gel - Kamuflažni gel

EN Special colored camouflage gel with medium viscosity and superb covering capability. Our „oldest“ camouflage gel is a real icon in the Classic Line with permanent success since its first introduction thanks to the perfect color tone and easy application. Can be pinched superbly.

SRB Specijalan kamuflažni gel u boji srednje gustine koji odlično pokriva. Naš „najstariji“ kamuflažni gel je prava ikona „Classic“ linije proizvoda koji ima trajni uspeh još od njegovog prvog pojavljivanja zahvaljujući svom savršenom tonu boje i lakom nanošenju. Odlično se pinčuje.

Pro Cover Pink Gel

Camouflage Gel - Kamuflažni gel

EN High-end nail bed extension gel. Optimal pigmentation to ensure the professional combination of excellent covering and complete curing. Medium viscosity provides enough time to create the extended nail bed but also ensures fluent work. Its special color perfectly matches the tone of the natural nail bed. Can be pinched superbly.

SRB Vrhunski gel za produženje nokatne ploče. Optimalna pigmentacija koja obezbeđuje profesionalnu kombinaciju odličnog prekrivanja i potpunog sušenja. Srednja gustina gela pruža dovoljno vremena za produžavanje nokatne ploče, ali i obezbeđuje nesmetan rad. Njegova posebna boja savršeno odgovara tonu prirodnog nokta. Može se izvanredno pinčovati.

CLASSIC LINE

Deluxe Camouflage Gel

Camouflage Gel - Kamuflažni gel

EN Medium viscosity sculpting camouflage gel.

Features:

- one phase
- crystalline structure
- ensures complete control but also self-levelling
- quick and easy saloon nails
- can be pinched superbly therefore also highly recommended for extreme forms

- savršeno se pinčuje i iz tog razloga ga preporučujemo za ekstremne forme

Glamour Cover Pink Gel

Camouflage Gel - Kamuflažni gel

EN Medium viscosity camouflage gel with special ice crystal shining pearly effect. Can be pinched superbly.

Note: It is recommended to gently stir up the gel before each usage as the shining glitters may sink down on the bottom of the pot.

SRB Kamuflažni gel srednje gustine sa posebnim efektom sjaja ledenih kristalnih perlica. Može se izvanredno pinčovati.

Beleška: Preporučuje se mešanje gela pre upotrebe pošto sjaj može potonuti na dno bočice.

CLASSIC LINE

X White Gel

French Gel - Gel za francuski manikir

EN Flowing viscosity french white gel. Self levelling snow white gel without any yellow effects. Durable, flexible thin gel which is very easy to apply and work with.

SRB Tečan beli gel za francuski manikir. Samoravnjajući snežno beli gel bez ikakvog efekta žućenja. Dugotrajan, fleksibilan redak gel koji se lako nanosi i koji je lak za upotrebu.

Xtreme Thick White Gel

French Gel - Gel za francuski manikir

EN Extremely white french gel with superb covering capability. Due to its thick consistency the gel can be controlled easily and spread smoothly which helps to create the perfect french smile line. Can be curved superbly and also suitable for 3D nail art purposes.

SRB Izuzetno beli gel za francuski manikir sa vrhunskim mogućnostima prekrivanja. Zbog svoje gustine gel se može lako kontrolisati i lagano se razliva, što omogućava da se napravi savršena polukružna 'smily' linija. Može se sjajno izvući kriva linija tako da je odličan u svrhe 3D nail arta.

CLASSIC LINE

Deluxe Snow White Gel

French Gel - Gel za francuski manikir

EN Blinding white unique french gel which cures through completely even if used in thick layers. The special crystalline structure of this flawless white gel ensures complete control and easy application. Can be pinched superbly.

SRB Zaslepljujući beli unikatni gel za francuski manikir koji se potpuno suši u lampi ukoliko se nanese u debljem sloju. Specijalna kristalna struktura ovog besprekomog belog gela obezbeđuje potpunu kontrolu i lako nanošenje. Može se izvanredno pinčovati.

Milky White Gel

French Gel - Gel za francuski manikir

EN Semi-transparent natural milky white colored french gel to achieve „milky french” or the trendy “Baby Boomer” effect by covering the entire nail as a top layer. Ensures very elegant natural and stylish appearance. Due to its consistency the gel can be used for sculpting purposes as well. Can be pinched superbly.

SRB Poluprovidan prirodni mlečno bele boje za postizanje „mlečnog francuskog” ili aktuelnog „Baby Boomer” efekta pokrivanjem celog nokta kao završni sloj. Obezbeđuje veoma elegantan prirodan i stilizovan izgled. Zbog svoje gustine gel se može koristiti i za izlivanje. Može se izvanredno pinčovati.

SALOON NAILS WITH CLASSIC DELUXE GELS

SALONSKI NOKTI SA CLASSIC DELUXE GELOVIMA

Further Step by Step about Extreme Nail sculpting with Deluxe Gels on page 103.

Još objašnjenja „korak po korak“ u vezi sa ekstremnim izlivanjem noktiju sa Delux gelovima na strani 103.

STEP BY STEP

- 1 Apply Nail Prep and then Primer (and/or Acid Free Primer) on the natural nail.
 - 2 Set up the nail form. Apply a very thin layer of Bond Booster Base Gel and “massage” the gel deep into the fibers of the natural nail with the brush. Do not clean the tacky residue after curing.
 - 3 Create the extended nail bed with Deluxe Camouflage Gel. After curing apply some Deluxe Natural Gel near the cuticle to give even more natural color for the extended nail bed.
 - 4 Remove tacky residue after curing. Shape the smile line with a file. Remove dust and push the Deluxe Snow White Gel towards the wall of the smile line. Cure the white gel. After removing the nail form there might be some gel residue on the nail form and not on a clear (transparent) base. Put back the nail in the UV lamp (without nail form) for further 1 minute so that the white part can cure properly from the bottom as well.
 - 5 Clean after curing. File the nail with a very fine file (minimum 180 grit or even finer) to reach the desired form and finally cover with glossy gel (Luxury Glossy Finish Gel or ColorMe! Base/Gloss).
- 1 Nanesite Nail Prep, a zatim Primer (i/ili Primer bez kiseline) na prirodni nokat.
 - 2 Postavite šablon. Nanesite jako tanak sloj Bond Booster Base Gel-a i pomoću četkice „umasirajte“ gel duboko u vlakna prirodnog nokta. Nemojte uklanjati lepljive ostatke nakon sušenja.
 - 3 Napravite produžetak nokta pomoću Deluxe Camouflage Gel-a. Nakon sušenja nanesite malo Deluxe Natural Gel-a u blizini zanoktica kako biste dobili još prirodniju boju produženog nokta.
 - 4 Uklonite lepljive ostatke nakon sušenja. Napravite polukružnu „smily“ liniju pomoću turpije. Ukolnite prašinu i gurnite Deluxe Snow White Gel prema ivicama te poukružne linije. Osušite beli gel. Nakon uklanjanja šablona može biti nekih ostataka gela na šablonu pošto beli gel stavljamo direktno na šablon, a ne na providni bazni gel. Ponovo vratite nokat u UV lampu (bez šablona) da se suši još 1 minut kako bi se beli deo dobro osušio i pri dnu.
 - 5 Očistite nakon sušenja. Isturpijajte nokat veoma blagom turpijom (najmanje granulacije 180 ili još blažom) kako biste dobili željeni oblik i na kraju nanesite sjajni gel (Luxury Glossy Finish Gel ili ColorMe! Base/Gloss).

Notice: The usage of Deluxe Snow White Gel is absolutely the same as for all other French white gels. The extra tip and the enclosed step-by-step series only highlight the unique features of this white gel showing alternative ways for its usage.

Napomena: Deluxe Snow White Gel se koristi potpuno isto kao i svaki drugi beli gel za French. Dodatni savet i priloženo objašnjenje korak-po-korak samo ističu jedinstvena svojstva ovog belog gela pokazujući druge načine njegovog korišćenja.

EN Thanks to high pigmentation the LeGrande Color Gels cover flawlessly only with one layer. Special components ensure perfect curing after only 2 minutes in UV light. Moreover all LeGrande Color Gels cure in LED and CCFL lamp as well. These gels do not need to be cleaned / wiped after curing (no tacky residue) and the surface will have brilliant shine meaning there is no need to cover with Glossy Gel.

Quicker and easier work with less used materials and perfect upshot... this is LeGrande Color Gel only from Mystic Nails.

Specially recommended when:

- the nail is covered completely with Color Gel (lasts 10 days)
- making one-movement designs
- making nail art on the top (after Glossy Gel applied)

Tip: In case covering the whole nail with one color if you wish to ensure more durability we recommend the use of ColorMe! Base/Gloss or Luxury Glossy Finish Gel on the top. Before applying the glossy top cover cure the LeGrande Color Gel only for 10 seconds in UV lamp so the glossy cover will stick on the surface without any problems. The flexible glossy top gels (mentioned above) will ensure multiple durability.

How to use:

1. File the sculpted nail.
2. Apply one layer of LeGrande Color Gel and cure for 2 minutes in UV light.
3. Ready! (No clean, no top coat).

Kako se koristi:

1. Isturpijajte izliveni nokat.
2. Nanesite jedan sloj LeGrande Color gela i sušite 2 minuta u UV lampi.
3. Gotovo! (bez čišćenja, bez završnog sjaja).

SRB Zahvaljujući visokoj pigmentaciji, nanošenjem samo jednog sloja ovih gelova svaka površina će besprekorno biti pokrivena. Njegove posebne komponente obezbeđuju savršeno sušenje nakon samo 2 minuta pod UV svetlošću. Takođe, svi LeGrande Color Gel-ovi se dobro suše u LED i CCFL lampi. Ovi gelovi nemoraju da se brišu nakon sušenja (nema lepljivog sloja), a površina nokta će imati neverovatan sjaj, što znači da preko ovih gelova nije potrebno nanošenje Glossy gelova. Brži i jednostavniji rad sa upotrebom manje materijala i sjajnim efektima ...to vam obezbeđuje LeGrande Color Gel koji možete naći samo u Mystic Nails.

Posebno se preporučuje kada se:

- na ceo nokat nanosi gel u boji
- pravi dizajn one stroke tehnikom
- radi nail art na površini (nakon nanošenja Glossy gela)

Savet: U slučaju nanošenja jedne boje na ceo nokat ukoliko želite da obezbedite dugotrajnost, preporučujemo upotrebu ColorMe! Base/Gloss ili Luxury Glossy Finish Gel na kraju. Pre nanošenja završnog sjaja sušite LeGrande Color Gel samo 10 sekundi u UV lampi kako bi završni sjaj ostao na površini bez problema. Fleksibilni gelovi za završni sjaj (gore pomenuti) obezbeđuju višestruku dugotrajnost.

 UV Painting Nail Art gelovi

Gyimesi Dóra

EN Easy and quick nail art on top of the nail ensuring as detailed and precise work as no other nail art paint or gel before.

Comparing with Acrylic Paint:

- can paint **incredibly thin lines** which has been only possible with acrylic paints until now
- **perfect for all acrylic paint nail art techniques:** one stroke, zhostovo
- thanks to their fantastic covering capability these painting gels **ensure more living colors** while shading than the water based paints
- **BUT** you do not need to matte the surface under the nail art as these painting gels **perfectly stick on any glossy surface as well**
- there is **no need to add water** to reach

- the needed consistency
- the UV Painting Gels do not dry in air so there is **no need to refresh the paint on the brush** time to time
- they cure only in UV light **ensuring unlimited time** to finish your precise detailed works
- **cures without tacky layer** so there is no need to clean **neither need to cover with Glossy Gel** (however if you want you can use glossy gel to cover as it will stick without any problems on the UV Painting Gel after cured)

USAGE:

Only apply on dry and clean, non oily surface! We can use on wiped glossy or even matte surfaces or on the top of non tacky Glossy Top Gel. (Be careful not to touch the surface where you want to apply to preserve from oils.)

SRB Nail art koji se lako i brzo nanosi na nokat omogućujući detaljniji i precizniji rad nego ikada do sad.

U poređenju sa akrilnom bojom:

- njime se mogu oslikavati neverovatno tanke linije, što je do sada bilo moguće samo sa akrilnim bojama
- savršen za sve nail art tehnike akrilom: one stroke, zhostovo
- zahvaljujući fantastičnoj sposobnosti prekrivanja ovi gelovi za crtanje daju življe boje prilikom senčenja nego boje na bazi vode
- **ALL** ne morate da matirate površinu ispod nail arta pošto ovi gelovi za crtanje savršeno prijanjaju i na svaku sjajnu površinu
- nema potrebe da dodajete vodu kako biste postigli potrebnu gustinu

- UV gelovi za crtanje (UV Painting Gels) se ne suše na vazduhu tako da nema potrebe da osvežavate boju na četkici s vremena na vreme
- oni se suše pod UV svetlošću obezbeđujući vam neograničeno vreme da završite detalje za koje vam je potrebna preciznost
- suši se ne ostavljajući lepljivi sloj, tako da nema potrebe da čistite niti da nanosite sjaj - Glossy Gel (međutim, ukoliko želite, možete naneti završni sjaj pošto će bez problema prionuti na UV Painting Gel posle sušenja)

UPOTREBA:

Nanesite na suhu i čistu, nemasnu površinu! Možemo ga koristiti i na obrisanu sjajnu ili čak i matiranu površinu ili preko nelepljivog Glossy Top gela. (Pazite da ne dodirnete površinu na koju želite da ga nanesete, kako ne biste naneli masnoću na nju).

Nail Art Gel Combinations

Step By Step

Color: 09 Color: 06 Color: 11 Color: 07 Color: 10

EN - EXTRA TIP:

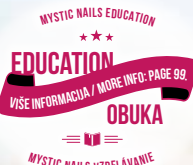

- 1) You can easily make 3D designs by applying more layers on each other. The more layers of UV Painting Gel stick on each other after curing without any problems (despite there is no tacky residue after curing). Use more layers and do not try to apply and cure the total height of the 3D design in one step.
- 2) You can easily reach new shades and tones by mixing the gels with each other!

SRB - DODATNI SAVET:

- 1) Lako možete praviti 3D dizajne nanoseći više slojeva jedan preko drugog. Više slojeva UV Painting Gela prijanjaju jedan na drugi nakon sušenja bez problema (uprkos tome što posle sušenja ne ostaju lepljivi ostaci). Nanesite više slojeva i ne pokušavajte da nanosite i sušite sve slojeve 3D dizajna odjednom.
- 2) Lako možete postići nove nijanse i tonove mešanjem gelova jedan sa drugim!

Sjajni pigment u boji

2g

Step by Step

1. Apply the ColorMe! polish-gel (Night Fever) in two layers and cure both layers separately and completely.
2. Apply the Shimmer Pigment Dust (Color no. 08.) with the natural haired brush on the tacky residue of the gel-polish. Remove the surplus of the pigment which does not stick in the gel with the same brush.
3. Cover the entire nail with ColorMe! Base/Gloss.

1. Nanesite ColorMe! gel- lak (Night Fever) u dva sloja i potpuno osušite oba sloja odvojeno.
2. Nanesite sjajni pigment (boja br. 08) četkicom od prirodne dlake na lepljive ostatke gel-laka. Istom tom četkicom ukolonite višak pigmenta koji se nije zalepio na gel-lak .
3. Nanesite ColorMe!Base/Gloss na celu površinu nokta.

EN This extremely fine grained special pigment powder gives you the key to create beautiful and eye-catching effects with a very simple and quick nail art technique. Shimmer Pigment Dusts provide many options as you can cover the complete nail or only the free edge but it is also possible to make nail art decorations with them.

USAGE:

Always apply on the sticky surface of any Color Gels, Gel-Polishes or any gels which have tacky residue after curing but BEFORE cleaning with Gel Cleanser. Use roundish soft natural haired brush to apply. (For this we recommend an old well-worn Kolinsky sculpting brush with size #8 - #12.)

SRB Ovaj izuzetno fino granuliran prašak sa specijalnim pigmentom je vaš ključ za postizanje prelepih efekata koji privlače poglede pomoću jednostavne i brze tehnike nail arta. Sjajni pigment u boju otvara mnoge mogućnosti s obzirom da ga možete naneti na ceo nokat ili samo na vrh nokta, ali njima možete praviti i ukrase pomoću nail arta.

UPOTREBA:

Uvek nanosite ovu prašinu na lepljivu površinu bilo kog gela u boji, gel-laka ili bilo kog drugog gela koji ostavlja lepljive ostatke posle sušenja, ali je nanosite PRE nego što očistite nokat pomoću Gel Cleanser. Za nanošenje koristite meku, zaobljenu četkicu od prirodne dlake. (Za ovo vam preporučujemo staru dobro istrošenu Kolinsky četkicu za oblikovanje u veličini #8 - #12.)

EN

- If removed from jar it stays **usable for hours**
- If painted on a nail in a thin layer it **dries in air**
- Thanks to its **creamy consistency** and high pigmentation these acrylic paints have **great covering capability** ensuring lively painted flowers and nail art designs
- **Specifically recommended** for painting nail art decorations, shading and contouring 3D acrylic designs

SRB

- Ako se izvade iz bočice, ostaće upotrebljive satima
- Ako se nanese na nokat u tankom sloju, suše se na vazduhu
- Zahvaljujući svojoj kremastoj gustini i velikoj pigmentaciji, ove akrilne boje imaju sjajnu sposobnost prekrivanja čime obezbeđuju žive boje cveća i nail art dizajna
- Posebno se preporučuju za mikro ortanje, senčenje i ostale tehnike nail art-a
