- Ekstremna fleksibilnost sprečava pucanje i lomljenje
- Savršeno prijanjanje
- Sjajni za nanošenje i preko akrilnih noktiju
- Dugotrajnost bez ikakvih problema

Važna napomena: Svaku boju nanosite u veoma tankim slojevima i ne pokušavajte da postignete potpunu i savršenu prekrivenost sa samo jednim slojem.

Tamnijim bojama je potrebno više vremena da bi se dobro osušile: 3 minuta u UV lampi (36W).

- 3 step gel polish system (base - color - top)
- Extreme flexibility prevents cracking and breaking
- Perfect adhesion
- Great to use on acrylic nails as well
- Long lasting durable wear without any problems

Important: Always apply every color in very thin layers and try not to achieve complete and perfect covering with only one layer.

Darker colors need more time to cure properly: 3 minutes in UV lamp (36W).

MATTE FINISH

GEL LAKOVI - GEL POLISH

- Završni mat gel lak
- Dobro promućkati pre upotrebe
- Suši se ostavljajući lepljive tragove
- Savet:** Potpuno je pogodan za upotrebu preko gelova u boji, pa čak i preko akrilnih boja. Uvek ga nanesite preko cele površine nokta, pošto će oni delovi koje ne pokrijete ostati sjajni.

- *Matte top gel polish*

- *Shake up well before usage*

- *Cures with sticky surface*

Tip: Absolutely suitable to use on Color Gels and even on acrylics. Always cover the complete surface of the nail as the missed parts will stay shiny.

Shimmer Pigment Dust

SHIMMER PIGMENT DUST

2g

Ovaj ekstremno fino granulirani pigmentirani prah predstavlja ključ za pravljenje prelepih, upadljivih efekata pomoću veoma jednostavne i brze nail art tehnike. Svetlucavi pigmentirani prah vam pruža mnoge mogućnosti pošto njime možete prekriti ceo nokat ili samo njegov vrh, ali je sa njime moguće i napraviti nail art ukrase.

UPOTREBA:

Uvek ga nanesite na lepljivu površinu bilo kog gela u boji, gel laka ili bilo kog gela koji ostavlja lepljive tragove nakon sušenja, ali ga nanesite PRE nego što očistite lepljive tragove sa Gel Cleanserom. Koristite zaobljenu, meku četkicu sa prirodnom dlakom za njegovo nanošenje. (Za ovo vam preporučujemo staru, istrošenu Kolinsky četkicu za izivanje veličine #8 - #12)

This extremely fine grained special pigment powder gives you the key to create beautiful and eye-catching effects with a very simple and quick nail art technique.

Shimmer Pigment Dusts provide many options as you can cover the complete nail or only the free edge but it is also possible to make nail art decorations with them.

USAGE:

Always apply on the sticky surface of any Color Gels, Gel-Polishes or any gels which have tacky residue after curing but BEFORE cleaning with Gel Cleanser. Use roundish soft natural haired brush to apply. (For this we recommend an old well-worn Kolinsky sculpting brush with size #8 - #12.)

Kako se koristi?

- nanosite na ceo nokat
- koristite ga samo za deo nokta
- koristite ga kao dodatak za druge vrste nail arta

Savet: Onaj deo stikera koji visi preko slobodne ivice nakon što se stavi, može se lako ukloniti veoma finom blok turpijom, jednim blagim pokretom.

Važna napomena: Ako sa Mysticker-om prekrivate ceo nokat, preko njega bi trebalo naneti tanak sloj bilo kog providnog bilder gela kako biste osigurali dugotrajnost. U tom slučaju, nije dovoljno prekriti ga samo sa završnim sjajem.

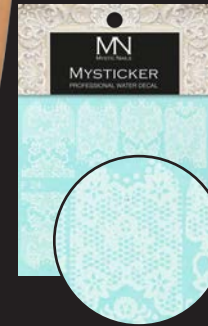

How to use it?

- cover the whole nail
- use for only part of the nail
- use as an additional design to other nail arts

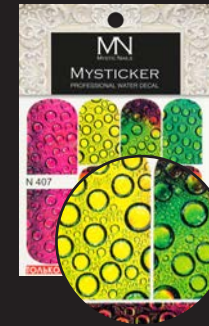

Tip: The part of the stickers hanging over the free edge after applied can be easily removed with a very fine buffer by one slight move.

Important: If the whole nail is covered with Mysticker a thin layer of any clear sculpting gels should be applied as an overlay to ensure durable finish. In this case it is not enough to cover only with glossy finishing top gel.

ROLĂ ȘABLOANE MYSTIC - SALON
MYSTIC NAIL FORM - SALON

Papir:

Ovom šablonu koji je napravljen od papira vrhunskog kvaliteta, ojačanog vlaknima ne treba dodatna stabilizacija pomoću ojačavajućeg aluminijumskog sloja ili drugih pomagala.

Prijanjanje:

Unutrašnja strana je prekrivena izuzetno snažnim prijanjajućim slojem, tako da se šablon čvrsto prilepi za nokatnu ploču i krila šablona se čvrsto prilepe jedno za drugo, čime se obezbeđuje besprekorna stabilnost tokom procesa izlivanja nokta.

Učvršćivanje šablona:

Zbog specijalnog materijala papira i snažnog prijanjajućeg dejstva, lako možemo da napravimo završni oblik izlivenog nokta samo time što ćemo šablon postaviti ispravno i samim tim ne moramo da dodatno savijamo (pinčujemo) šablon tokom izlivanja.

Postavka:

Izbušeni unutrašnji centar u obliku krila i žute usmeravajuće linije su ključni za postavljanje šablona koji okružuje vrh jagodice prsta, nakon čega je potrebno što je moguće čvršće prilepiti krila jedno za drugo.

Usmeravajuće linije:

Prilikom postavke šablona nokta, žute usmeravajuće linije koje prate linije uglova nokta vam pokazuju gde i kako da sečete šablon da bi ste obezbedili savršeno uklapanje uz slobodnu ivicu nokta. Isecite šablon duž žute usmeravajuće linije sve do krila izbušenog unutrašnjeg centra.

Formacija:

Dizajn i optimalna veličina krila sa strane obezbeđuju stabilnost prilikom postavljanja šablona, ali i sprečavaju pomeranje prilikom stavljanja nokta u lampu.

Aplikacija:

Posebno izrađeni za salonski rad, ovaj šablon je savršen za izlivanje četvrtastih, ovalnih, okruglih, bademastih oblika, kao i oblika ruskog badema, monroe i pipe oblika, ali i drugih.

Paper:

Made of premium quality **fiber-reinforced paper** this form does not need any further stabilization with aluminium form underlay or other accessories.

Adhesion:

The back side is covered with **super strong adhesive coating** so that the form sticks strongly to the finger's skin and also to itself (the wings to each other) in order to ensure flawless stability during the sculpting process.

Form keeping:

Due to its special paper material and strong adhesion we can easily create the final form of the sculpted nail just by setting up the nail form correctly and **without having to pinch additionally** during the sculpting.

Set up:

The **perforated wing-shape inner centre** and the **yellow guiding lines** are the key to be able to set up the form bypassing the fingertip and paste together its wings as tight as possible.

Guiding lines:

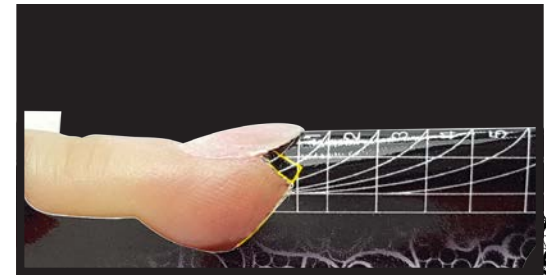

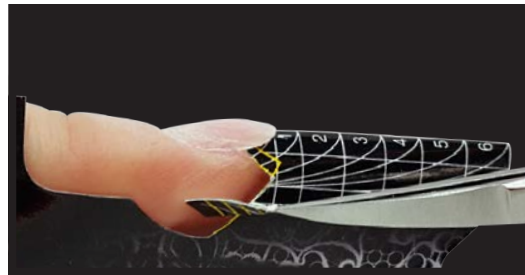

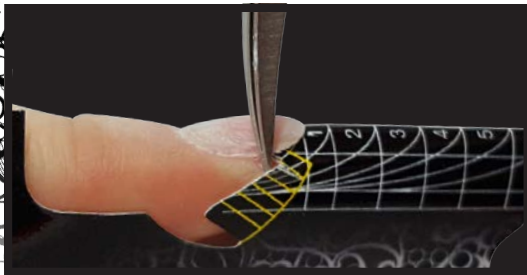

While setting up the nail form the **yellow guiding lines** which meet the corner points of the natural nail will show you where and how to cut out the form to ensure the very best fitting to the free edge. Cut the form along the yellow guiding line until the wings of the **perforated inner centre**.

Formation:

The **design and the optimal size of the side wings** ensure stable hold while setting up the form but also prevent from displacement when placing the nail in the lamp.

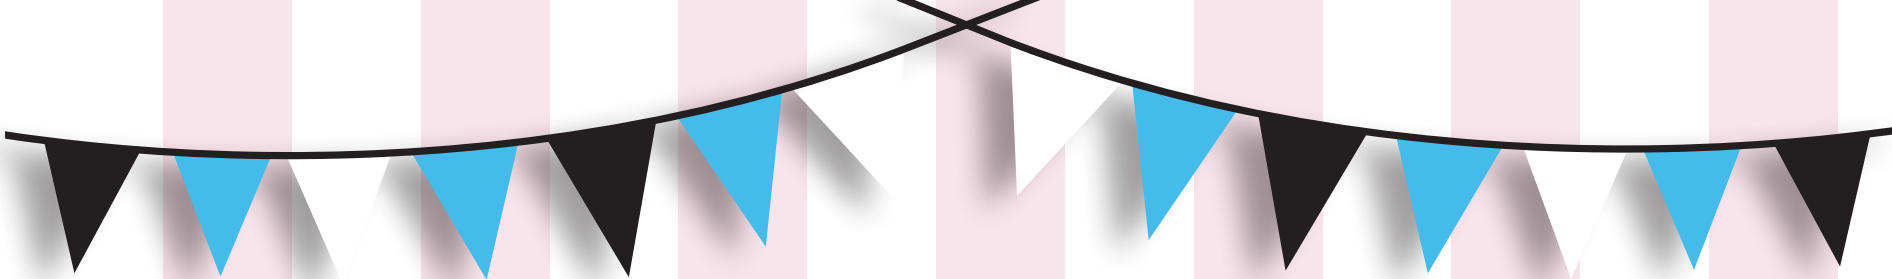

Application:

Specifically **crafted for salon work** this form is superb to use for square, oval, round, almond, russian almond, monroe and pipe forms but not limited to them.
